Letter from the Chairman

When we started Trinity Energy in 2012, our vision was for an energy secure South Sudan fueled by indigenous private sector participation. I am glad to note that Trinity Energy is firmly steering this energy security agenda for the country. We can confidently say that through Trinity Energy's contributions, South Sudan has experienced unprecedented levels of energy security. With this success, we are proud to also note that Trinity Energy has grown to become the largest¹ indigenous owned energy company in South Sudan.

¹ Claim based on internal estimations of Trinity Energy's market share compared to other independent and indigenous owned energy companies in South Sudan.

While strides have been made in securing energy security for South Sudan, a lot still remains to be done to secure the country's energy security for current and future generations. Indeed South Sudan is a country abounding with opportunities. The recent peace agreement has all the more ushered the great potential the country holds. As a locally owned energy player we will continue to take a long term view of South Sudan cognizant that our own journey of growth and sustainability will closely mirror the South Sudanese journey.

I am proud to note that at Trinity Energy we are leading the way for other private sector players and corporate entities in South Sudan to embrace good governance and ethical corporate practices. For this contribution we are regularly recognized and celebrated, as recently happened with the South Sudan Chamber of Commerce.

We believe that the future and prosperity of South Sudan and indeed that of the rest of Africa rests in a vibrant private sector that

has a close engagement with Government. We will keep responding actively to this challenge and doing our part to contribute to the future of the people of South Sudan. We invite our customers and stakeholders to partner with us in this journey.

Thank you.

Akol E. Ayii
Chairman and Founder

About Trinity Energy

Trinity Energy is a private energy company based in South Sudan's capital, Juba. Started in 2012, Trinity Energy has become the Nation's largest privately owned independent energy company.

At Trinity Energy we support our clients with reliable access to high-quality fuel products. Our depot in Nesitu safeguards our clients from exposure to changing market conditions. With one of the few fuel testing labs in South Sudan, our clients are confident their fuel is safe and compliant with accepted standards. Trinity Energy's experience allows us to offer an uninterrupted supply of fuel and lubricants, even in remote locations.

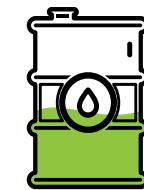

In 2019, Trinity Energy provided over 40%² of South Sudan's energy demand. More than half of the nation's fuel retailers rely on Trinity Energy's reliable supply chain to meet their clients' needs. The company owns 6 million litres of fuel storage at our depot in Nesitu, which includes an additional 2 million litres of

storage currently under development. This development makes Trinity Energy the Nation's largest fuel storage and logistics provider. Trinity Energy assures our clients of consistent and reliable fuel supply. Trinity Energy plays a critical role in assuring the security of petroleum supply for the country.

We are proud to have Africa's largest trade finance bank, the African Export-Import Bank (Afrexim Bank), as our financial partner.

Together, we support our customers and secure South Sudan's petroleum supply. Through our relationship with global and regional petroleum trading companies, our upstream supply of fuel products is unparalleled in South Sudan. With offices in South Sudan, Kenya, Ethiopia, and the United Arab Emirates, we hold a global footprint that allows us to structure bespoke solutions for our customers. These factors combine to ensure our clients enjoy versatile service, quality products, and a secure supply of vital fuel products.

**40%

Investing in a Nation

As a corporate leader in the nation, we communicate to public and private stakeholders the business value of sustainability and accountability. We are proud to set a new standard for good corporate governance practices in South Sudan. We firmly believe that a vibrant and well governed private sector will drive sustainable growth and prosperity in South Sudan.

We attribute our success to our vision for a more prosperous South Sudan, our dedication to transparency, and a corporate culture that rewards ethical conduct. **Our commitment to corporate and social accountability has driven us to reinvest in the nation – developing infrastructure and strengthening vendor and supply chain relationships.** Investing in our community, employees, and infrastructure allows us to offer products and services that exceed our customer's expectations. Trinity Energy believes business ethics are a core enabler of sustainable development. Through our commitment to these ethics, we strive to pave a meaningful pathway towards a more prosperous, sustainable, and equitable future for our communities.

Why organizations choose Trinity.

Nationwide Delivery

Trinity Energy arranges nation-wide fuel delivery for clients, even in high-risk or austere environments.

Quality Product

Trinity Energy products are tested and our upstream providers offer industry leading quality and consistency.

Resilient Operations

Trinity Energy protects our clients from volatility giving our clients energy security and peace of mind.

Flexible Contracting

Trinity accommodates customers with unique needs or contract terms, including payment schedules.

Enterprise Services and products

Fuel Delivery

Trinity Energy provides both diesel and petrol to stationary installations, infrastructure, and diesel generator sites. Based on client needs, we can tailor logistics and supply chains to ensure delivery of fuel products to remote, challenging, or high-threat locations. Our fuel storage allows us to deliver an uninterrupted supply of bulk fuel to our customers.

Bulk Fuel Supply

Trinity Energy supplies automobile gasoline and diesel fuel in bulk to large consumers, downstream oil marketing companies, and retail filling stations. Partnering with Trinity Energy allows bulk fuel consumers and marketing companies to focus on their core business of selling, as Trinity Energy addresses their procurement and logistics needs.

Customers with self-managed distribution and supply chains can purchase fuel in large quantities directly from our depot at Nesitu. Customers using this service enjoy the ability to buy quality tested fuel products in bulk without needing to arrange for cross-border transportation.

Onsite Fueling Solutions

Trinity Energy can arrange custom onsite storage solutions for clients looking to leverage on our existing capabilities without making a substantial capital investment themselves.

Why customers trust Trinity.

Large Footprint

Trinity Energy is the largest retail fuel vendor in South Sudan with stations in Juba, Wau, Nimule and Terekeka.

Quality Fuel

Trinity Energy fuel is tested for quality at our testing lab in Nesitu - the only such lab in South Sudan.

Flexible Plans

Clients can arrange for fleet vehicles to refuel at any of our nationwide locations with flexible payment terms.

Retail fuel Products and services

Trinity Energy has the largest retail petroleum footprint in South Sudan.

Serving over 25,000 customers a month, Trinity Energy filling stations offer recognized quality and service. All stations can process payment in cash, Visa, and now **m-GURUSH**. Organizational customers can arrange fuel purchasing agreements with Trinity Energy to offer drivers and fleet vehicles flexible fueling options throughout the country. Our robust supply chain allows our stations to maintain fuel availability even when others are suffering from fuel shortages.

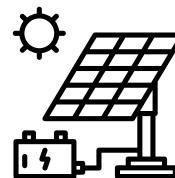

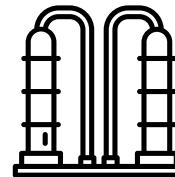

Beginning in 2020, Trinity Energy has started an ambitious expansion plan. To better serve our community, we are investing in the construction of an additional 24 retail filling stations nationwide, part of our plan to construct 100 retail outlets country wide by 2024. These new filling stations will compliment the planned expansion of our fuel storage capacity in further expanding access to fuel and energy throughout the Nation.

Sustainable Development

Trinity Energy promotes sustainable development in our communities. Our commitment extends to the foundation of our business. Trinity Energy has adopted a precautionary approach to environmental challenges and recognises its obligation to expanding access to affordable, reliable, sustainable, and modern energy. Trinity Energy proudly invests in sustainable and renewable energy infrastructure and environmentally responsible product offerings.

In line with this commitment for sustainable development, Trinity Energy will soon launch an initiative to limit the human, ecological, and developmental effects resulting from the use of unsustainable cooking fuels. Using charcoal and firewood contribute to deforestation and are a significant cause of respiratory illness and eye diseases. As part of this effort, Trinity Energy will introduce affordable commercial and domestic liquefied petroleum gas ("LPG") products as a more sustainable alternative to charcoal and firewood. Through these and other efforts, we reinforce our commitment to sustainable development in South Sudan.

Efficient and Clean Refining

Using modern technology and manufacturing processes, the 40,000 barrel per day Trinity Energy refinery in Paloch will set a new standard for efficiency and environmental responsibility in Africa.

Sustainable Power Generation

Trinity Energy is working in collaboration with the South Sudan Ministry of Energy and Dams (MED) and Afrexim Bank in the development of a 20MW solar power plant

Clean Cooking Fuel

Trinity Energy will introduce affordable commercial and domestic liquefied petroleum gas ("LPG") products as a more sustainable alternative to charcoal and firewood.

Responsible corporate citizenship.

We commit to support the communities within which we operate, and to society at large. We focus our community support efforts to four overarching program areas.

Education and Vocational Training

We work to create a future for our youth. Trinity Energy supports educational initiatives, especially girls education and vocational training. Our efforts encourage class attendance and promote entrepreneurship.

Agriculture

We partner with smallholder farmers and likeminded development partners to improve yields, strengthen rural economies, and enhance food security.

Health

We support efforts that provide access to quality healthcare for vulnerable groups. At the forefront of the fight against Covid-19 in South Sudan, we have donated over \$600,000 to the cause.

Environment

We lead efforts to diversify South Sudan's energy mix and promote the introduction of renewable energy streams. Through efficiency we strive to minimise our carbon footprint.

Values drive our customer and community interaction.

Trinity Energy commits to sustainable development. Our core values of accountability, transparency, and ethical conduct direct our corporate processes and vision. Through these values and our commitment to furthering the Sustainable Development Goals, we meaningfully contribute to a sustainable future for South Sudan. In furtherance of this goal, Trinity Energy will publish and make available sustainability reports by 2021. In doing so, Trinity Energy will be the first South Sudanese company, and among the few in East Africa, to invest in this level of transparency and accountability.

Trinity Energy is

An **advocate** for the health and wellbeing of our communities

A **promoter** of responsible conduct in South Sudan

A **champion** of private sector growth in South Sudan.
